BATCH 31 — REPOSITORY MAPPING & FILE OWNERSHIP MANUAL

Daniel Macharia <danielmacharia43@gmail.com>
To: <daniel@ics.ac.ke>

Tue, 16 Jun at 08:34

This document should be issued together with the Run-to-Green Manual and Developer Handover Memo.

BATCH 31 — REPOSITORY MAPPING & FILE OWNERSHIP MANUAL

Meat Lovers CIMS powered by YohPal

VERSION: 1.0

STATUS: MANDATORY

PURPOSE

This manual defines:

- Repository structure
- Folder ownership
- Module ownership
- Dependency chain
- Responsible developer/team
- Change control boundaries

No developer may modify a module outside their ownership without approval.

1. MASTER REPOSITORY STRUCTURE

FOLDER

apps/monitoring-web/

OWNER

Management Intelligence Team

PURPOSE

Real-time visibility.

RESPONSIBLE FOR

- KPI dashboard
- Alerts
- Monitoring
- Risk visibility

DEPENDENCIES

All modules

Monitoring

6. BACKEND MODULE

FOLDER

backend/

OWNER

Backend Team

PURPOSE

System of record.

RESPONSIBLE FOR

- Authentication
- APIs
- Business logic
- Enforcement
- Reporting

DEPENDENCIES

Database

Backend

All Frontends

7. DATABASE MODULE

FOLDER

database/

OWNER

Database Team

SUBFOLDERS

migrations/
seeds/
backups/

RESPONSIBLE FOR

- Schema
- Data integrity
- Backup validation

NO FRONTEND CHANGES ALLOWED HERE

8. DEPLOYMENT MODULE

FOLDER

deployment/

OWNER

DevOps Team

RESPONSIBLE FOR

- Nginx
 - Apache
 - Backups
 - LAN deployment
 - Server configuration
-

9. DOCUMENTATION MODULE

FOLDER

docs/

OWNER

Architecture Team

RESPONSIBLE FOR

- Manuals
 - SOPs
 - Runbooks
 - Certification documents
-

10. DATABASE OWNERSHIP

CRM Tables

OWNER

CRM Team

Tables:

14. CHANGE CONTROL

Developers may change:

Files owned by their team

Developers may NOT change:

Other module ownership

Database ownership

Security ownership

Enforcement ownership

Without approval.

15. HIGH-RISK FILES

Changes require approval.

AuthController

EnforcementController

FinanceController

IncomeStatementController

AuditLogger

Approval Engine

Database Migrations

Deployment Configs

16. FINAL RULE

Every file must have:

1. Owner
2. Purpose
3. Dependency chain

If ownership is unclear:

DO NOT MODIFY.

Escalate for approval.

END OF DOCUMENT

Batch 31 Outcome

- ✓ Repository structure mapped
- ✓ Folder ownership defined
- ✓ Module ownership defined
- ✓ Database ownership defined
- ✓ Dependency chains documented
- ✓ High-risk files identified
- ✓ Change-control boundaries established
