Batch 10 — Admin Operational Modules UI

Meat Lovers CIMS powered by YohPal

10A.

apps/admin-web/src/components/common/OperationalPage.jsx

```
import React from 'react'
import { useQuery } from '@tanstack/react-query'
import Page from '../ui/Page'
import Card from '../ui/Card'
import DataTable from '../ui/DataTable'
import LoadingBlock from '../ui/LoadingBlock'
import StatusMessage from '../ui/StatusMessage'

export default function OperationalPage({ title, subtitle, queryKey, queryFn, columns, mapRows }) {
  const { data, isLoading, error } = useQuery({
    queryKey: [queryKey],
    queryFn,
  })

  const rows = mapRows ? mapRows(data) : data || []

  return (
    <Page title={title} subtitle={subtitle}>
      <Card>
        {isLoading ? <LoadingBlock label={`Loading ${title.toLowerCase()}...`} /> : null}
        {error ? <StatusMessage error={error.message} /> : null}
        {!isLoading && !error ? <DataTable columns={columns} rows={rows} /> : null}
      </Card>
    </Page>
  )
}
```

10B.

apps/admin-web/src/features/operations/api/operationsApi.js

```
import apiClient from '../../../lib/apiClient'

export const operationsApi = {
  suppliers: async () => {
    const { data } = await apiClient.get('/suppliers')
    return data.data.suppliers
  },

  products: async () => {
    const { data } = await apiClient.get('/products')
    return data.data.products
  },

  stock: async () => {
    const { data } = await apiClient.get('/inventory/stock-summary')
    return data.data.stock
  },

  barStock: async () => {
    const { data } = await apiClient.get('/bar/stock')
    return data.data.bar_stock
  },

  kitchenOrders: async () => {
    const { data } = await apiClient.get('/kitchen/orders')
    return data.data.kitchen_orders
  },

  dispatchOrders: async () => {
```

```

    const { data } = await apiClient.get('/dispatch/orders')
    return data.data.deliveries
  },

  unsoldFood: async () => {
    const { data } = await apiClient.get('/unsold-food')
    return data.data.unsold_food
  },

  assets: async () => {
    const { data } = await apiClient.get('/assets')
    return data.data.assets
  },

  staff: async () => {
    const { data } = await apiClient.get('/hrm/staff')
    return data.data.staff
  },

  financeTransactions: async () => {
    const { data } = await apiClient.get('/finance/transactions')
    return data.data.finance_transactions
  },

  incomeStatementDaily: async () => {
    const { data } = await apiClient.get('/income-statement/daily')
    return data.data
  },

  incomeStatementWeekly: async () => {
    const { data } = await apiClient.get('/income-statement/weekly')
    return data.data
  },

  incomeStatementMonthly: async () => {
    const { data } = await apiClient.get('/income-statement/monthly')
    return data.data
  },

  incomeStatementAnnual: async () => {
    const { data } = await apiClient.get('/income-statement/annual')
    return data.data
  },
}

```

10C.

apps/admin-web/src/features/operations/pages/SuppliersOperationalPage.jsx

```

import React from 'react'
import OperationalPage from '../../../components/common/OperationalPage'

        { key: 'reference_number', label: 'Reference' },
        { key: 'created_by_name', label: 'Created By' },
        { key: 'created_at', label: 'Date' },
      ]}
    />
  )
}

```

10M.

apps/admin-web/src/features/operations/pages/IncomeStatementPage.jsx

```

import React, { useState } from 'react'
import { useQuery } from '@tanstack/react-query'
import Page from '../../../components/ui/Page'
import Card from '../../../components/ui/Card'
import Button from '../../../components/ui/Button'
import LoadingBlock from '../../../components/ui/LoadingBlock'
import StatusMessage from '../../../components/ui/StatusMessage'
import { operationsApi } from '../../../api/operationsApi'

const loaders = {
  daily: operationsApi.incomeStatementDaily,
  weekly: operationsApi.incomeStatementWeekly,
  monthly: operationsApi.incomeStatementMonthly,
  annual: operationsApi.incomeStatementAnnual,
}

```

```

export default function IncomeStatementPage() {
  const [period, setPeriod] = useState('daily')

  const { data, isLoading, error } = useQuery({
    queryKey: ['income-statement', period],
    queryFn: loaders[period],
  })

  return (
    <Page title="Income Statement" subtitle="Daily, weekly, monthly, and annual P&L">
      <div style={{ display: 'flex', gap: 10, flexWrap: 'wrap' }}>
        <Button onClick={() => setPeriod('daily')}>Daily</Button>
        <Button onClick={() => setPeriod('weekly')}>Weekly</Button>
        <Button onClick={() => setPeriod('monthly')}>Monthly</Button>
        <Button onClick={() => setPeriod('annual')}>Annual</Button>
      </div>

      {isLoading ? <LoadingBlock label="Loading income statement..." /> : null}
      {error ? <StatusMessage error={error.message} /> : null}

      {data ? (
        <div style={{ display: 'grid', gridTemplateColumns: 'repeat(5, minmax(0, 1fr))', gap: 16 }}>
          <Card title="Sales Income"><strong>{data.sales_income}</strong></Card>
          <Card title="Other Income"><strong>{data.other_income}</strong></Card>
          <Card title="Total Income"><strong>{data.total_income}</strong></Card>
          <Card title="Expenses"><strong>{data.total_expenses}</strong></Card>
          <Card title="Net Profit"><strong>{data.net_profit}</strong></Card>
        </div>
      ) : null}
    </Page>
  )
}

```

10N. Update

apps/admin-web/src/app/routes.jsx

Add imports:

```

import SuppliersOperationalPage from '../features/operations/pages/SuppliersOperationalPage'
import ProductsOperationalPage from '../features/operations/pages/ProductsOperationalPage'
import StockOperationalPage from '../features/operations/pages/StockOperationalPage'
import BarOperationalPage from '../features/operations/pages/BarOperationalPage'
import KitchenOperationalPage from '../features/operations/pages/KitchenOperationalPage'
import DispatchOperationalPage from '../features/operations/pages/DispatchOperationalPage'
import UnsoldFoodOperationalPage from '../features/operations/pages/UnsoldFoodOperationalPage'
import AssetsOperationalPage from '../features/operations/pages/AssetsOperationalPage'
import HRMOperationalPage from '../features/operations/pages/HRMOperationalPage'
import FinanceOperationalPage from '../features/operations/pages/FinanceOperationalPage'
import IncomeStatementPage from '../features/operations/pages/IncomeStatementPage'

```

Add routes inside DashboardLayout:

```

<Route path="/ops/suppliers" element={<SuppliersOperationalPage />} />
<Route path="/ops/products" element={<ProductsOperationalPage />} />
<Route path="/ops/stock" element={<StockOperationalPage />} />
<Route path="/ops/bar" element={<BarOperationalPage />} />
<Route path="/ops/kitchen" element={<KitchenOperationalPage />} />
<Route path="/ops/dispatch" element={<DispatchOperationalPage />} />
<Route path="/ops/unsold-food" element={<UnsoldFoodOperationalPage />} />
<Route path="/ops/assets" element={<AssetsOperationalPage />} />
<Route path="/ops/hrm" element={<HRMOperationalPage />} />
<Route path="/ops/finance" element={<FinanceOperationalPage />} />
<Route path="/ops/income-statement" element={<IncomeStatementPage />} />

```

100. Update

apps/admin-web/src/components/common/SidebarNav.jsx

Add these links:

```

['Ops Suppliers', '/ops/suppliers'],
['Ops Products', '/ops/products'],
['Ops Stock', '/ops/stock'],
['Ops Bar', '/ops/bar'],
['Ops Kitchen', '/ops/kitchen'],
['Ops Dispatch', '/ops/dispatch'],
['Ops Unsold Food', '/ops/unsold-food'],
['Ops Assets', '/ops/assets'],
['Ops HRM', '/ops/hrm'],
['Ops Finance', '/ops/finance'],

```

```
['Income Statement', '/ops/income-statement'],
```

10P.

docs/ADMIN_OPERATIONAL_MODULES_UI.md

Batch 10 — Admin Operational Modules UI

System

Meat Lovers CIMS powered by YohPal

Purpose

This batch adds admin visibility for core restaurant departments.

Modules Added

1. Suppliers
2. Products
3. Stock
4. Bar
5. Kitchen
6. Dispatch
7. Unsold cooked food
8. Assets
9. HRM
10. Finance
11. Income statement

Business Control Value

Suppliers

Shows supply source accountability.

Products

Confirms food, soft drinks, and alcoholic drinks separation.

Stock

Supports storekeeping control and theft detection.

Bar

Separates alcoholic drinks accountability from food and soft drinks.

Kitchen

Shows food production queue.

Dispatch

Shows delivery fulfilment status.

Unsold Food

Tracks cooked food that was not sold.

Assets

Tracks restaurant equipment and asset register.

HRM

Shows staff and roles.

Finance

Shows income and expense entries.

Income Statement

Shows daily, weekly, monthly, and annual profit/loss visibility.

Developer Note

This batch uses a shared `OperationalPage` component to avoid repeated page code.

Each module still has its own page file for clean routing and future customization.

Batch 10 Outcome

Admin dashboard now includes UI pages for:

- ✓ suppliers page
- ✓ products page
- ✓ stock page
- ✓ bar page
- ✓ kitchen page
- ✓ dispatch page

- ✓ unsold food page
- ✓ assets page
- ✓ HRM page
- ✓ finance page
- ✓ income statement page

Next Smart Move

Build **Batch 11 — Admin Operational Forms Pack**, adding create/update forms for:

- supplier creation
- product creation
- stock-in
- bar stock issue
- kitchen mark ready action
- dispatch action
- unsold food declaration
- asset creation
- staff creation
- finance transaction creation
